

Project Executable Files

Date	26 June 2026
Team ID	SWIID-2026-1243
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This document contains the executable and deployment files required for EduGenie – Google Gemini Powered Learning Assistant. The project is organized using a modular architecture with separate frontend and backend components. It includes the complete source code, dependency files, environment configuration, documentation, and setup instructions, allowing evaluators to run the application locally or deploy it with minimal configuration.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar) or	Yes

6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

EduGenie-Google-Gemini-Powered-Learning-Assistant/

```

|
|  └── backend/
|      ├── main.py
|      ├── routes/
|      ├── services/
|      ├── models/
|      └── utils/
|
|  └── frontend/
|      ├── templates/
|      ├── static/
|          ├── css/
|          ├── js/
|          └── images/
|
|  └── tests/
|
|  └── docs/
|
|  └── .env.example
|
|  └── requirements.txt
|
|  └── README.md
|
|  └── LICENSE
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/nitishsoni07-ui/EduGenie-Google-Gemini-Powered-Learning-Assistant

Demo Video Link	
------------------------	--

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- Python 3.11 or later
- Git
- Google Gemini API Key
- Internet connection
- Visual Studio Code (recommended)

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI response may take longer for lengthy educational queries.	Optimize prompts and ensure a stable internet connection.
2	Google Gemini features require a valid API key.	Configure the API key correctly in the .env file before running the project.
3	The application currently supports local deployment only.	Cloud deployment (e.g., Render or Railway) can be added as a future enhancement.
